Training Day 3 Report

30 JUNE 2025

Hyperlinks & Linking in Websites

What is a website?

A website is a collection of interconnected content with navigation tools.It is a group of web pages (like Home, About, Contact, etc.) that share a common domain name and are stored on a web server.
You can view a website using browsers like **Google Chrome, Safari, Edge, or Firefox**.

Types of Links :

Type	Description
External	Link to another website
Internal	Link to another page on same website
Anchor	Link to a section on the same page

<**a** href="https://example.com" target="_blank" title="Visit site">**EXTERNAL LINK**</**a**>

<**a** href="page2.html">**Internal Link**</**a**>

<**a** href="#TOP">**Back to Top**</**a**>   ***Anchor link***

Anchor Linking Use Cases
- Table of Contents
- FAQ sections
- "Top of the page" links
- Contact/About sections

Images in HTML

Why Use Images?

- User-friendly interface
- Information display (e.g. banners, logos, products)

Image Tag Syntax

`<img src="image.jpg" alt="Description" width="400" height="300" title="Image Title" loading="lazy">`

Attribute	Purpose
src	Source of the image
alt	Alternate text for accessibility
width	Width in pixels or %
height	Height in pixels or %
title	Tooltip text
loading	Lazy (default) or eager loading

Combining Links with Images

```
<a href="product.html">
  <img src="product.jpg" alt="Product">
</a>
```
